DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement (IDS) submitted on 4/8/10 was filed after the mailing date of the Advisory Action on 2/24/10. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Allowable Subject Matter

2. Claims 61-73 and 80-90 are allowed.
3. The following is an examiner's statement of reasons for allowance:

Applicant's independent claim 73 is drawn to a mobile electronic communications device comprising, a transceiver, a touch-screen display configured to display a virtual keypad having a plurality of virtual keys, and a processor unit coupled to the transceiver and touch-screen display, wherein the processor unit is configured to associate the virtual keys with corresponding contacts of a contact list stored on the mobile electronic communications device each of the virtual keys of said plurality being associated with only one corresponding contact of said contact list, wherein a first contact of said contact list associated with a first virtual key of the plurality and a second contact of said contact list is associated with a second virtual key of the plurality, compare received message data to said contact list, determine, based on the comparison, that a first received message is from a first contact of the contact list and that a second received message is from a second contact of said contact list, animate the first virtual key to indicate receipt of the first received message from the first contact of the contact list,

wherein the animated first virtual key manifests an appearance of being in motion, animate the second virtual key to indicate receipt of the second received message from the second contact of said contact list, wherein the animated second virtual key manifests an appearance of being in motion, cause the touch-screen display to display a first list of messages received from only the first contact in response to the selection, by a user, of the first virtual key, and cause the touch-screen display to display a second list of messages received from only the second contact in response to the selection, by the user, of the second virtual key. This particular combination of elements claimed as Applicant's invention is neither taught nor suggested by the prior art.

Applicant's independent claim 80 is drawn to a mobile electronic communications device comprising, a transceiver, a touch-screen display configured to display a virtual keypad, and a processor unit coupled to the transceiver and touch-screen display, wherein the processor unit is configured to cause the touch-screen display to animate one of at least four virtual keys of the virtual keypad to indicate receipt of messages from one of at least four contacts of a contact list, the contact list being stored on the mobile electronic communications device and each of the at least four contacts being associated with one of the at least four virtual keys of the touch-screen display, a first of said at least four contacts being the only contact associated with a first virtual key, a second of said at least four contacts being the only contact associated with the second virtual key, a third of said at least four contacts being the only contact associated with a third virtual key and a fourth of said at least four contacts being the only contact associated with a fifth virtual key, and wherein the animated virtual keys manifest an

appearance of a motion selected from the group consisting of blinking, rotating, vibrating, and morphing into another shape, and cause the touch-screen display to display a list of messages to and from only the first of said at least four contacts in response to the selection, by a user, of the first virtual key, display a list of messages to and from only the second of said at least four contacts in response to the selection, by the user, of the second virtual key, display a list of messages to and from only the third of said at least four contacts in response to the selection, by the user, of the third virtual key, and display a list of messages to and from only the fourth of said at least four contacts in response to the selection, by the user, of the fourth virtual key. This particular combination of elements claimed as Applicant's invention is neither taught nor suggested by the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
